WORK ON FUEL DISTRIBUTION PROBLEMS

REQUIRE ESTIMATED FUEL CONSUMPTION REPORTS -- Budapest, Magyar Kozlony, 5 Aug 50

The President of the State Planning Office has issued a decree giving the procedure for reporting changes in the estimated coal, coal briquette, semicoke briquette, coke briquette, and coke requirements for the last quarter of 1950. Fuel consumers will submit itemized reports of estimated requirements for the fourth quarter of 1950 to their immediate supervising agencies or ministries by 16 August 1950. The respective ministries will submit their total estimated requirements to the Materials and Froducts Distribution Division of the Ministry of Heavy Industry. After deciding on the fuel allotments the latter will report its decisions to the ministries after approval by the State Planning Office.

The industrial divisions of the respective ministries will report their allotments to the Mining Division VI of the Ministry of Heavy Industry by 31 August 1950. The latter will inform the ministries by 5 September 1950 of the fuel-producing agencies which are to fulfill requirements of the respective min-

The fuel-producing agencies will submit itemized reports on their estimated monthly production for the fourth quarter of 1950 by 16 August 1950 to the Mining Division VI of the Ministry of Heavy Industry.

FIRST COAL COMBINE IN OPERATION -- budapest, Szabad Nep, 18 Aug 50

On 17 August, the first USSR coal combine was put into operation in Hungary in the Lion XVI mine at Tatabanya. The USSR "Donbass" machine filled 67 hoppers and sided them to the chain. It removes a half meter of coal wall in one minute.

WORKERS PURCHASE MORE FUEL THAN LAST YEAR -- Budapest, Kis Ujsag 10 Aug 50

TUKER, the state fuel enterprise, is giving the workers much better quality coal this year in connection with the 9- and 6-month fuel loan bonds. This was made possible by the spread of the worker competition movement and the resulting production of more and better coal.

CONFIDENTIAL

50X1-HUM

According to the report of the Ministry of Domestic Commerce, torkers regime 14.0 percent more for this year tend for year as a result of the loon bond drive. The increase in sales of more expensive types of coal is noteworthy: 247 percent more coke and briquette coal was ordered or three and a half times as much as last year. This means that 30 to 40 percent more calories of fuel are available per worker.

The factories, too, have had their part in the organization and success of the loan bond program. There is no important factory which has not taken part in the loan bond program for the benefit of its workers.

Non-Budapest workers ordered almost as much coal as the Budapest workers. The increased production and the higher standard of living are shown by the expansion of the national network of the TUKER state enterprise.

TRY "LONG-DISTANCE HEATING" THIS YEAR -- Budapest, Kis Ujsag, 9 Aug 50

"Long-distance heating" will be introduced experimentally in several houses this fall. In "long-distance heating," steam which has already been used in an industrial process is piped to a dwelling, to be used in the central heating system. This kind of heating will be used this winter in the 152 apartments of the Kossuth Lajos Street apartment block at Csepel, and in the row of houses being built on Harmat Street in the tenth district of Budapest.
